Journal of Electroanalytical Chemistry 475 (1999) 197–199

JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject Index of Volume 475

Absorption
Electrochemical determination of hydrogen in metals, 82
Ac impedance
Theoretical models for ac impedance of finite diffusion layers exhibiting low frequency dispersion, 152
Adsorption
Electrochemical behaviour of amino acids on Pt(*hkl*). A voltammetric and in situ FTIR study: Part IV. Serine and alanine on Pt(100) and Pt(110), 38
In situ orientation study of xanthate on copper under potential control, 124
Adsorption at Au(111)
Electrochemical and FTIR studies of 4-cyanopyridine adsorption at the gold(111) | solution interface, 130
Ag(111)
Formation of ZnSe on Ag(111) by electrochemical atomic layer epitaxy, 164
Alanine
Electrochemical behaviour of amino acids on Pt(*hkl*). A voltammetric and in situ FTIR study: Part IV. Serine and alanine on Pt(100) and Pt(110), 38
Anion effect
Spectroelectrochemical study of the influence of anions on the behaviour of poly(*N*-vinylcarbazole) films, 1
Atomic layer epitaxy
Formation of ZnSe on Ag(111) by electrochemical atomic layer epitaxy, 164
Au(100) electrode
Surface alloying at the Cd | Au(100) interface in the upd region. Electrochemical studies and in situ EC-AFM observation, 171

Cadmium
Surface alloying at the Cd | Au(100) interface in the upd region. Electrochemical studies and in situ EC-AFM observation, 171
Carbon paste electrode
Coordination of silver(I) at the surface of carbon paste electrodes modified with 2,5,8-trithia[9]-*m*-cyclophane as studied by cyclic voltammetry, 73
Catalysis
The use of regularization methods in the deconvolution of underlying distributions in electrochemical processes, 28
Catalyst layer
Electrochemical impedance of the cathode catalyst layer in polymer electrolyte fuel cells, 107
Charge transfer kinetics
Electrochemistry of homoepitaxial CVD diamond: energetics and electrode kinetics in aqueous electrolytes, 139
Complex impedance
Electrochemical impedance of the cathode catalyst layer in polymer electrolyte fuel cells, 107
Complexing properties
Transfer of heavy metal ions across the water | nitrobenzene microinterface facilitated by the cadmium selective ionophore ETH1062, 9
Conducting polymer
Theoretical models for ac impedance of finite diffusion layers exhibiting low frequency dispersion, 152
Conductivity
Spectroelectrochemical study of the influence of anions on the behaviour of poly(*N*-vinylcarbazole) films, 1
Constant phase element
Theoretical models for ac impedance of finite diffusion layers exhibiting low frequency dispersion, 152
Contact electric resistance technique
Passivation mechanism of iron in concentrated phosphoric acid, 58
Copper electrode
In situ orientation study of xanthate on copper under potential control, 124
4-Cyanopyridine
Electrochemical and FTIR studies of 4-cyanopyridine adsorption at the gold(111) | solution interface, 130
Cyclic voltammetry
Coordination of silver(I) at the surface of carbon paste electrodes modified with 2,5,8-trithia[9]-*m*-cyclophane as studied by cyclic voltammetry, 73
Electrochemical behaviour of amino acids on Pt(*hkl*). A voltammetric and in situ FTIR study: Part IV. Serine and alanine on Pt(100) and Pt(110), 38
Cyclophane derivative
Coordination of silver(I) at the surface of carbon paste electrodes modified with 2,5,8-trithia[9]-*m*-cyclophane as studied by cyclic voltammetry, 73

Desorption
Electrochemical determination of hydrogen in metals, 82
Diamond
Electrochemistry of homoepitaxial CVD diamond: energetics and electrode kinetics in aqueous electrolytes, 139
Diffusion
Theoretical models for ac impedance of finite diffusion layers exhibiting low frequency dispersion, 152
Diffusivity
Electrochemical determination of hydrogen in metals, 82

Electrochemical atomic force microscopy
Surface alloying at the Cd | Au(100) interface in the upd region. Electrochemical studies and in situ EC-AFM observation, 171
Electrochemical impedance spectroscopy
Passivation mechanism of iron in concentrated phosphoric acid, 58
Electrochromism
Logistic differential equation: A general equation for electrointercalation processes?, 190, 193
Electrodeposition
Electrodeposition of zinc + iron alloys: II. Relation between the stripping results and ex-situ characterization, 66

PII: S0022-0728(99)00375-7

Electropolymerization
Spectroelectrochemical study of the influence of anions on the behaviour of poly(*N*-vinylcarbazole) films, 1
Equivalent circuit
Theoretical models for ac impedance of finite diffusion layers exhibiting low frequency dispersion, 152

Fe/85% H_3PO_4 system
Passivation mechanism of iron in concentrated phosphoric acid, 58
Formamidine disulphide electrochemical reactions
Electrochemical response of thiourea and formamidine disulphide on polycrystalline platinum in aqueous 0.5 M sulphuric acid, 181
FTIR spectroscopy
Electrochemical behaviour of amino acids on Pt(*hkl*). A voltammetric and in situ FTIR study: Part IV. Serine and alanine on Pt(100) and Pt(110), 38

Hydrogen
Electrochemical determination of hydrogen in metals, 82

Insertion
Theoretical models for ac impedance of finite diffusion layers exhibiting low frequency dispersion, 152
In-situ reflection IR spectroscopy
Electrochemical and FTIR studies of 4-cyanopyridine adsorption at the gold(111) | solution interface, 130
Intercalation
Logistic differential equation: A general equation for electrointercalation processes?, 190, 193
Ionophore
Transfer of heavy metal ions across the water | nitrobenzene microinterface facilitated by the cadmium selective ionophore ETH1062, 9
Ion transfer
Transfer of heavy metal ions across the water | nitrobenzene microinterface facilitated by the cadmium selective ionophore ETH1062, 9
Iridium oxide
Anion and water involvement in hydrous Ir oxide redox reactions in acidic solutions, 20

Kinetic model
Passivation mechanism of iron in concentrated phosphoric acid, 58
Kinetics
The use of regularization methods in the deconvolution of underlying distributions in electrochemical processes, 28

Large bandgap semiconductors
Electrochemistry of homoepitaxial CVD diamond: energetics and electrode kinetics in aqueous electrolytes, 139
Linear sweep voltammetry
Logistic differential equation: A general equation for electrointercalation processes?, 190, 193
Liquid | liquid interfaces
Specific adsorption at modulated liquid | liquid interfaces, 46
Transfer of heavy metal ions across the water | nitrobenzene microinterface facilitated by the cadmium selective ionophore ETH1062, 9
Logistic equation
Logistic differential equation: A general equation for electrointercalation processes?, 190, 193

Microhole
Transfer of heavy metal ions across the water | nitrobenzene microinterface facilitated by the cadmium selective ionophore ETH1062, 9
Modified electrode
Coordination of silver(I) at the surface of carbon paste electrodes modified with 2,5,8-trithia[9]-*m*-cyclophane as studied by cyclic voltammetry, 73

Oxidation
Electrochemical behaviour of amino acids on Pt(*hkl*). A voltammetric and in situ FTIR study: Part IV. Serine and alanine on Pt(100) and Pt(110), 38

Passivation
Passivation mechanism of iron in concentrated phosphoric acid, 58
Permeation
Electrochemical determination of hydrogen in metals, 82
Platinum
Electrochemical response of thiourea and formamidine disulphide on polycrystalline platinum in aqueous 0.5 M sulphuric acid, 181
Polymer electrolyte fuel cell
Electrochemical impedance of the cathode catalyst layer in polymer electrolyte fuel cells, 107
Poly(*N*-vinylcarbazole)
Spectroelectrochemical study of the influence of anions on the behaviour of poly(*N*-vinylcarbazole) films, 1
Pulse polarography
Voltammetry of sparingly soluble metal complexes: a differential pulse polarographic study of the Zn(II) + oxalate system, 99

Redox reaction
Anion and water involvement in hydrous Ir oxide redox reactions in acidic solutions, 20
Regularization methods
The use of regularization methods in the deconvolution of underlying distributions in electrochemical processes, 28
Rotating ring-disk electrode
Passivation mechanism of iron in concentrated phosphoric acid, 58
Roughness
Specific adsorption at modulated liquid | liquid interfaces, 46

Semiconductor electrochemistry
Electrochemistry of homoepitaxial CVD diamond: energetics and electrode kinetics in aqueous electrolytes, 139
Serine
Electrochemical behaviour of amino acids on Pt(*hkl*). A voltammetric and in situ FTIR study: Part IV. Serine and alanine on Pt(100) and Pt(110), 38
Silver
Coordination of silver(I) at the surface of carbon paste electrodes modified with 2,5,8-trithia[9]-*m*-cyclophane as studied by cyclic voltammetry, 73
Specific adsorption
Specific adsorption at modulated liquid | liquid interfaces, 46
Spectroelectrochemistry
Spectroelectrochemical study of the influence of anions on the behaviour of poly(*N*-vinylcarbazole) films, 1
Stripping
Electrodeposition of zinc + iron alloys: II. Relation between the stripping results and ex-situ characterization, 66
Surface alloying
Surface alloying at the Cd | Au(100) interface in the upd region. Electrochemical studies and in situ EC-AFM observation, 171
Surface complex
Coordination of silver(I) at the surface of carbon paste electrodes modified with 2,5,8-trithia[9]-*m*-cyclophane as studied by cyclic voltammetry, 73

Surface structure
Surface alloying at the Cd | Au(100) interface in the upd region. Electrochemical studies and in situ EC-AFM observation, 171
Thiourea electro-oxidation
Electrochemical response of thiourea and formamidine disulphide on polycrystalline platinum in aqueous 0.5 M sulphuric acid, 181
Thiourea–formamidine disulphide redox system
Electrochemical response of thiourea and formamidine disulphide on polycrystalline platinum in aqueous 0.5 M sulphuric acid, 181
Trapping
Electrochemical determination of hydrogen in metals, 82

Underpotential deposition
Surface alloying at the Cd | Au(100) interface in the upd region. Electrochemical studies and in situ EC-AFM observation, 171

Voltammetry
Transfer of heavy metal ions across the water | nitrobenzene microinterface facilitated by the cadmium selective ionophore ETH1062, 9
Voltammetry of sparingly soluble metal complexes: a differential pulse polarographic study of the Zn(II) + oxalate system 99

Xanthate
In situ orientation study of xanthate on copper under potential control, 124

Zinc + iron alloys
Electrodeposition of zinc + iron alloys: II. Relation between the stripping results and ex-situ characterization, 66
Zn(II) + oxalate system
Voltammetry of sparingly soluble metal complexes: a differential pulse polarographic study of the Zn(II) + oxalate system, 99
ZnSe
Formation of ZnSe on Ag(111) by electrochemical atomic layer epitaxy, 164
